

CAD

Logotag is a 2D CAD software application which was specially developed for machine processing. Featuring specific functions for the mechanical and marble industries, it is a quick and simple way of obtaining all the geometries and data required by Taglio's CAM applications in order to take full advantage of machine tool capabilities.

The work toolbars are divided by functions, and are fully customizable, with work area colour control and translations in 9 different languages making the use of the CAD simple and intuitive.

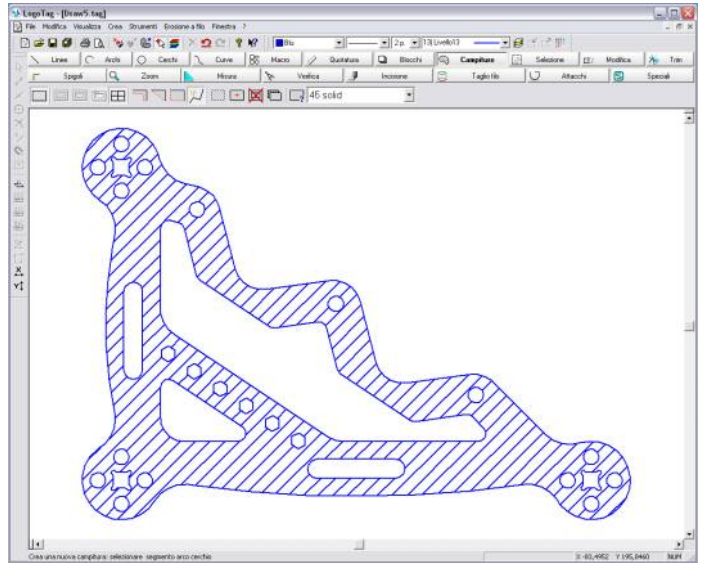

- Handling of different levels, thicknesses and types of lines
- Real-time editing of geometry using functions dedicated to the modification of elements
- Background BITMAP positioning and sizing to facilitate tracing and the drawing of complex geometries
- Optimized management of text and dimensions
- Three types of Auto Save: backup on opening, saving at pre-set times, saving whenever not in use
- Parametric figures and macros, with more than fifty standard figures and user figure creation capability
- Importing of TTF font for handling and processing text
- Matrix management

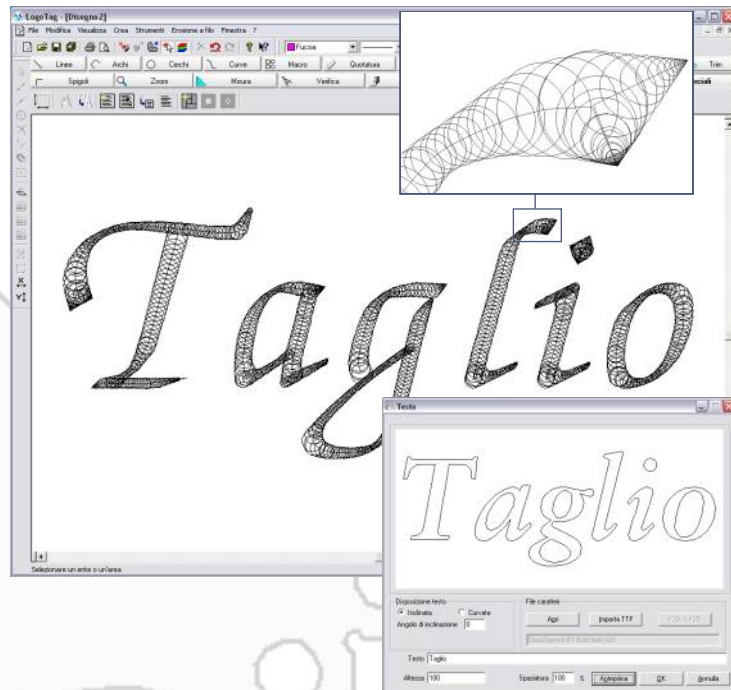

Conversion of:

- **DXF**
- **DWG**
Database Autocad®
- **EPS**
Postscript®
- **WMF - EMF**
Windows® Meta File (ClipArt)
- **PLT**
HPGL®
- **IGS**
Iges 2D
- **Files DSTV**

Textures- Hatchings

3D engraving

INTEGRATED CAM FUNCTIONS

- 3D engraving
- 2/4-axis wire cutting
- Piercing for bronze inserts
- Inlaywork

All the options work using just a postprocessor; NO ADDITIONAL CAM software needs to be installed.
